Blue Lagoon Flow Switch Plus

The Flow Switch Plus is the ideal protection for a UV-C disinfection system in your pool installation. It will turn off the lamp at insufficient water flow.

Operation

The Flow Switch Plus is the ideal protection for an electrical device in your pool installation, such as a UV-C device or other device rated at up to 10 amps, for which it is desirable that it is switched off once the water flow stops. Thanks to the compact design, the Flow Switch Plus is very easy to install. Using the special tee fitting, the flow switch can be easily integrated into your new or existing piping.

Advantages of the Blue Lagoon Flow Switch Plus

- Prevents systems from running without flow
- Easy installation thanks to the compact design
- Easy to combine
- Also suitable for salt-water systems

Blue Lagoon Flow Switch Plus Technical

120 V (Type B)

Art. number	5056584
Type	Type B
EAN	8714404044622
Voltage	120 V AC
Frequency	60 Hz
IP Class	54
Connection size, tee fitting	2"
Minimum flow	5,8 gpm
Maximum flow	100 gpm

230 V (Type E)

Art. number	5056586
Type	Type E
EAN	8714404044554
Voltage	230 V AC
Frequency	50 Hz
IP Class	54
Connection size, tee fitting	63 mm
Minimum flow	1,5 m ³ /h
Maximum flow	23 m ³ /h

230 V (Type F)

Art. number	5056579
Type	Type F
EAN	8714404044486
Voltage	230 V AC
Frequency	50 Hz
IP Class	54
Connection size, tee fitting	63 mm
Minimum flow	1,5 m ³ /h
Maximum flow	23 m ³ /h

230 V (Type G)

Art. number	5056587
Type	Type G
EAN	8714404044936
Voltage	230 V AC
Frequency	50 Hz
IP Class	54
Connection size, tee fitting	63 mm
Minimum flow	1,5 m ³ /h
Maximum flow	23 m ³ /h
